

Canvas is a learning management system, so it is going to feel different from just a gradebook because it is more for the student than for the parent.

To see grades, click on the dashboard, then click the view grades button on the right side of your screen:

This video explains how to view and interact with the grades window once you get there: <https://vimeo.com/74966156>. The instructions for accessing grades is different for us from the video because we haven't put grades in our navigation pane. However, they are all accessible from the dashboard by clicking view grades.
