English IV Summer Reading: Seamus Heaney’s Translation of *Beowulf*

This summer you will be reading a modern translation of the oldest epic in English literature – *Beowulf*. Although no one is certain exactly when it was first composed or transcribed, the poem probably evolved out of an oral tradition. Some researchers speculate that it was written down around A.D. 700 by an unknown author. The original language of *Beowulf* -- Old English -- is completely different from the Modern English we speak today; thus, what you will read is a twentieth-century translation.

Even though *Beowulf* is one of the earliest works of English literature, the story does not take place in England. Instead, it tells of events that occur in Sweden and on the Danish island of Zealand. Because the epic glorifies the actions of the Danes and the Geats, the adventure and historical story reflects the traditions and beliefs of the Anglo-Saxons and their Germanic ancestors.

At the beginning of the story, Hrothgar, King of the Danes on the island of Zealand, has built a great mead-hall named Heorot. Grendel, a monster believed to be descended from Cain, wreaks havoc and death in Heorot, forcing the Danes to abandon the hall for twelve years. After this period of time, Beowulf, a Geatish warrior, arrives with fourteen of his men and offers to defend the Danes against Grendel. And the hero’s journey begins . . .

Below you will find study questions to guide you in your reading. These are not required, but answering them will prove beneficial to your understanding of *Beowulf*.
